

PAGE ONE: AAUP APP SUPPORT

How Can We Help?

The AAUP App helps prospective and current students explore academic programs at Arab American University.

It may be used:

- Through an AAUP standalone interface; or
- With AI assistance through ChatGPT or another AAUP-approved interface.

The App provides preliminary information only. It does not issue official admission decisions.

Technical Support

Contact technical support when:

- The App does not open;
- The form does not load;
- A report is not generated;
- The interface displays an error;
- Arabic or English text is not displayed correctly;
- ChatGPT cannot connect to the AAUP App; or
- You believe the service has a security problem.

Networking and Technical Support Office

Email: support@aaup.edu

Phone: +970 4 2418888

Extension: 1666

When reporting a technical issue, please include:

- Whether you used ChatGPT or the standalone interface;
- The approximate date and time of the issue;
- The browser or device used;
- The general action that caused the issue; and

- A screenshot of the error, where appropriate.

Do not include passwords, student-portal credentials, national identification numbers, payment details, or official documents in a support request.

Admission and Program Questions

Contact the Deanship of Admission and Registration when:

- You need an official eligibility decision;
- Your certificate requires equivalency;
- Your certificate or branch is not recognized by the App;
- You need confirmation of a program requirement;
- You have questions about seat availability;
- You need an official tuition calculation;
- You need scholarship information;
- You need to submit documents; or
- The App's result appears to conflict with an official AAUP page.

Ramallah Campus: +970 2 2941999 or +972 2 2941979

Artificial Intelligence Office

For AI governance, responsible AI use, or questions about AAUP artificial intelligence services:

Office of the Vice President for Artificial Intelligence

Email: vpai@aaup.edu

Privacy and Security Questions

For questions about information processed by the App, review the AAUP App Privacy Notice.

Security concerns should be reported through AAUP's official technical-support channels. Do not publicly disclose a suspected vulnerability before AAUP has had an opportunity to investigate it.

AAUP applies information-security practices aligned with internationally recognized standards, including ISO/IEC 27001. The University has begun formal procedures toward obtaining ISO 27001 certification for its Information Security Management System.

Complaints and Feedback

Users may submit suggestions, service complaints, corrections, or accessibility feedback through AAUP's official Complaints and Feedback page.

When reporting inaccurate academic information, identify the affected program and include the official AAUP page that shows the correct information.

PAGE TWO: ABOUT THE AAUP APP

Explore AAUP Programs with Clearer Preliminary Guidance

The AAUP App is an academic-program exploration tool operated by Arab American University.

It helps prospective and current students identify AAUP bachelor's programs that may match their academic background, campus preference, interests, career goals, and tuition preference.

Two Ways to Use the App

Standalone App

Students can complete a structured form and generate a preliminary program report directly through an AAUP-operated interface.

AI-Assisted App

Students can describe their background and goals conversationally through ChatGPT or another AAUP-approved AI interface. The AI can help collect the required information, invoke the AAUP App, and explain the report.

The underlying AAUP eligibility report uses structured program and admissions information. AI assistance does not replace the report's published rules and does not create an official admission decision.

Information the App May Request

The App may ask for:

- Certificate system;
- Certificate branch or classification;
- Academic or equivalent average;
- Core-subject average, where applicable;
- Preferred campus;
- Academic interests;
- Career goals;
- Tuition preference; and
- Preferred language.

The App does not require a student-portal password, national identification number, payment information, or official document upload.

What the Report Shows

A report may include:

- Programs for which the user appears preliminarily eligible;
- Programs that require official certificate or classification review;
- Programs that do not currently meet a published requirement;
- Program campus and college;
- Published minimum requirements;
- Starting tuition information;
- Additional tests, interviews, or admission conditions;
- Reasons a program may match the user's interests; and
- Links or references to official AAUP admissions information.

Important Limitation

The AAUP App is not an admission application and does not guarantee admission.

Final eligibility must be confirmed by the AAUP Deanship of Admission and Registration. Admission may depend on document verification, certificate equivalency, seat availability, interviews, ability tests, medical or fitness requirements, and other official conditions.

Students should always review the data-verification date displayed in the report.

Privacy

The App is designed to request only information needed for preliminary program matching.

The current version does not create a permanent student profile or connect to private university academic records.

When the App is used through ChatGPT, OpenAI's applicable privacy policy, terms, and user settings also apply.

Review the AAUP App Privacy Notice for complete information.

AAUP supports the App within its broader information-security program, which applies internationally recognized standards including ISO/IEC 27001 and is progressing through formal procedures toward ISO 27001 certification.

Start Using the App

To use the App:

1. Select or describe your certificate system.
2. Enter your branch or classification.
3. Enter your academic or equivalent average.
4. Select your preferred campus.
5. Optionally provide interests, career goals, and tuition preference.
6. Review the complete report and its warnings.
7. Confirm final requirements through official AAUP sources.
